

Heavy Equipment and Machinery Division

***Complete recovery of machinery & manufacturing equipment.**

**Asset Recovery
Technologies, Inc.**

Heavy Equipment Division

Fire, water, chemical contamination...

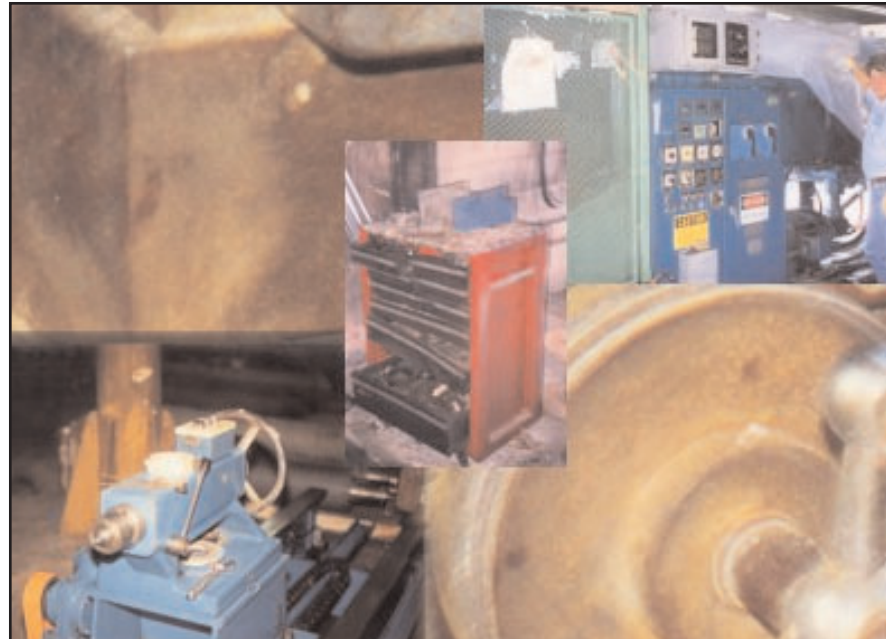

all wreak havoc on machinery; causing rust, corrosion, failures and product defects. Repairs cannot be preformed until the equipment is cleaned, and replacement may take months from overseas suppliers. The **ART Disaster Response Team** can put your company back in business fast!

By first analyzing with chemical testing and careful inspection, ART thoroughly investigates the adverse factors affecting your equipment. Corrosion, water intrusion, lubrication failure, metal pitting, etc. are all evaluated. From this careful analysis the ART Team immediately establishes the cleaning procedures required to restore your equipment, all within a matter of hours after arriving at your site.

Swinging into action within just a few hours of initial evaluation, the ART Team begins the process of recovering your equipment with a minimum of production interruption and a swift return to capacity.

The Recovery Steps:

- Inspection & Analysis by ART Mechanical Specialists
- On-site Chemical Testing of Corrosion (where applicable)
- Establishment of a Recovery Plan
- Removal of Moisture & Smoke
- Removal of Rust & Corrosion
- Re-lubrication & Repairs
- Re-instatement of Warranty (where applicable)
- Return to Service
- Complete Documentation for Insurance Purposes

ART mechanical specialists combine years of experience and technical expertise to ensure a successful recovery.

Mechanical, Industrial, and Manufacturing Equipment Serviced:

- CNC Machinery
- Large and Small Metalworking Machines
- Printing Presses
- Plastic Injection Molding Machinery
- Printed Circuit Board Fabrication
- Semiconductor Fabrication Equipment
- Electro-plating Lines
- Assembly, Conveyor and Materials Handling Equipment
- Control Centers
- Small Tools
- & All Other Types of Mechanical Equipment
