

Electronics Recovery

Electronic equipment from computers to phone systems to sophisticated medical equipment is surprisingly resilient if properly restored after water, smoke, moisture and other contamination. ART has pioneered state of the ART techniques to recover electronic equipment. Accurately assessing corrosion, degree of contamination, impact of water and moisture, etc. are all key elements of the technically sophisticated ART approach to recovery. Since its inception, ART has recovered thousands of PC's, networks, phone

systems, telecommunications and wireless phone equipment and more under the most adverse of circumstances.

ART Recovers:

- ◆ Computers, Servers, Networks, SAN Arrays, Data Centers
- ◆ Telecommunication Equipment, Hubs, & Routers
- ◆ Central Office & Cellular Phone Switch Centers
- ◆ Television & Radio Broadcast Equipment
- ◆ Medical & Dental Equipment
- ◆ Office Equipment
- ◆ Load Centers, Breaker Panels & Control Centers
