## FAQ's

**What operating system does this tablet use and what programs can I run?** The Thorium uses Android 5.1 Lollipop and can run most compatible programs from word processing and spreadsheet to insurance estimating programs.

**How does the Thorium connect to a satellite?** Located on the back of the tablet is a built-in satellite communications send/receive module.

**Can I use the Thorium as a satellite phone?** No. The Thorium is intended for the transmission of text message style emails, data, forms, etc. While voice type communications is not possible, valuable data can easily be sent and received while in the field.

**Will the Thorium work on Wi-Fi when it is available?** Absolutely! Once on Wi-Fi, Android based applications will run as usual.

**Can I use my usual email program?** Not while in satellite communications mode, but when on Wi-Fi you can use your usual Android app.

**How rugged is the Thorium?** The Thorium case is made of a magnesium alloy midframe and features elastomer bumpers (protected glass/touchscreen). MIL-STD-810 G and IP65 tested, it is easily the toughest tablet out there!

**How do I sign up for satellite service?** Through the manufacturer, CLS America.

**Do I have to sign a long term contract?** No! Short term service is available at a very reasonable price.

**What accessories and models are available?** The Thorium comes in Project Manager, and Field Commanders 1 & 2 versions. Extended life and hot swappable batteries, keyboard, carrying case, etc. are all available.

**How fast can I get one?** It can be drop shipped immediately to your location.

**Discounts for volume purchases, government agencies and emergency responders are available! For more information contact the CLS North American distributor: Asset Recovery Technologies, Inc. at (800) 805-0644 or [mail@disasterhelp.com](mailto:mail@disasterhelp.com)**
